FRACINO'S COMPACT COFFEE MACHINE WITH THE BIG TASTE

Fracino's Little Gem is an inspirational compact cappuccino coffee machine, specially designed to meet the needs of smaller venues. The Little Gem is a versatile, portable, commercial hand-fill machine that produces the finest coffee with no installation requirements other than a 13 amp socket.

Little Gem machines are semi-automatic or electronically controlled and have one group for coffee making, hot water facility and a steam tube for frothing milk.

The semi-automatic machine is operated by an illuminated rocker switch so the user can control the amount of coffee being dispensed into the cup. The electronically controlled model has an attractive silver bean-shaped touch pad with four accurately pre-programmed coffee measures and an override option.

The Little Gem has stainless steel panels and a metallic black chassis as standard. The colour of the chassis can be customised to suit individual requirements.

LGE - Little Gem Electronic

LG - Little Gem Semi-Automatic

ENGINEERING EXCELLENCE COMES AS STANDARD

The Little Gem is designed and manufactured in the UK to the highest standards using only the finest materials, the very latest machining methods and state-of-the-art electronic and safety components.

The commitment to excellence, skills and experience of Fracino engineers ensure that the Little Gem will give years of reliable coffee making.

KEY FEATURES

- Top quality copper boiler heated by a multiple looped element
- Pressure controlled by a triple contact pressure switch
- Automatic water level system with a probe, electronic control unit and solenoid valve
- Tank capacity sufficient for producing 70 espresso coffees
- Low level warning light on the front panel indicates that the water tank needs filling
- Power shut off feature to protect the element should the boiler water level drop
- The pressure of water and steam is separately controlled by brass safety valves
- Hot water and steam are released by rotating solid brass valves
- Brass bodied group with stainless steel shower plate, solenoid valve and high pressure pump
- Thermosyphonic circulation ensures the group is kept constantly hot for perfect coffee making

OPTIONAL EXTRAS

- Installation kit for connection to mains water supply
- Rapido automatic milk frother
